Java, Python, Javascript, HTML and CSS, React, C

Work experience

The Athlete Spine Website - Freelance work

January, 2024 - March, 2024

Worked periodically with 2 orthopaedic spine surgeons developing their website. Delivered a complete website that showcases their information, social media, videos, and guests:

<https://theathletespine.com/>

- Dynamically inserted content cards for 'Videos', 'Guests', and 'News' pages. These cards pull from separate CSV files
- Design choice includes making the site fully static, and embed Youtube videos. This keeps the website lightweight
- Gain experience with site hosting from reading online documentation

Uniqlo - Sales Associate

June, 2022 - Present

- Proficient in the variety of in-house applications. Some of which are used to track inventory, complete customer orders, review customer feedback, check security gates, and communicate with the team
- Ran staff checkout and self checkout, change store layout, hosted fitting rooms and other tasks

KBA Inc. - Office Engineer 1

October, 2019 - March, 2021

Worked across 4 city projects in Washington. Take on roles of Junior engineer and project administration

- Guided construction crews by understanding and navigating City's Plans and Specs
- Manage database for materials, Traffic Control and Field Note Records (summaries with drawings)
- Automated Bid Items to Field Note Records by auto-populating titles and numbers

Education

Oregon State University,
Bachelor of Science, Computer Science

March 2022 - June, 2024

University of Washington,
Bachelor of Science, Civil and Environmental Engineering

September, 2014 - June, 2018
